Re: Data Engineer (Req ID: 4476918574)

Cover Letter — Application for Data Engineer (Req ID: 4476918574)

Dear Accenture in India Hiring Team,

Your requisition opens with an explicit prerequisite: **"The candidate should have minimum 3 years of experience in Microsoft Azure Databricks."** As an Azure Data Engineer with **3.9 years at Cognizant**, verified **Databricks Certified Data Engineer Associate** certification, and immediate 30-day availability, I am equipped to contribute as an independent SME from day one.

Lakehouse Modernization & Runtime Acceleration. At Cognizant, I contributed to migrating 40+ legacy Informatica PowerCenter workflows to Azure Databricks Delta Lake and PySpark. By replacing scheduled batch pulls with incremental streaming and vectorized PySpark transforms, we reduced pipeline runtimes by **40%** and trimmed cloud compute infrastructure spend by **~30%** with 100% verified data parity.

Automated Ingestion & Medallion Architecture. I built multi-hop Lakehouse architectures across Bronze, Silver, and Gold tiers on ADLS Gen2. Using Databricks Auto Loader (`cloudFiles`) with automated schema evolution, I resolved schema drift at ingestion without aborting jobs, while authoring modular Python Apache Airflow DAGs with retries and SLA monitoring to sustain **99.8% pipeline uptime**.

Master Data Quality & Governance. Collaborating with cross-functional teams, I tuned Informatica MDM match-merge trust scores to eliminate **~15% duplicate entities** across customer master records, while enforcing centralized table- and column-level RBAC through Databricks Unity Catalog.

30-Day Notice Period & Immediate Value. In the current Indian hiring market, standard 90-day notice periods create severe quarterly delivery drag. Because I am currently serving my official notice period at Cognizant, **I am available to join within 30 days**. I hold confirmed offer leverage at 10.9 LPA, seek a fixed CTC of 15.0 to 18.0 LPA, and look forward to discussing how my lakehouse and data quality engineering background can accelerate Accenture in India's data platform deliverables.
