EY Global Delivery Services · AI and DATA (D&A) / Metadata Management Practice
Re: EY - GDS Consulting - AI and DATA - Azure Data Engineer - Staff (Req ID: 4477576256)

> **Cover Letter — Application for EY - GDS Consulting - AI and DATA - Azure Data Engineer - Staff (Req ID: 4477576256)**

Dear EY Global Delivery Services Hiring Team,

Your requisition seeks an experienced Azure Data Engineer in Databricks PySpark to play a key role in your **Metadata Management team**. My production delivery at Cognizant uniquely bridges Databricks PySpark with enterprise Master Data Management (Informatica MDM), metadata extraction, and data quality governance.

Metadata Management & Entity Deduplication. In enterprise master data operations, I tuned Informatica MDM match-and-merge rule sets, survivorship logic, and trust scores, eliminating **~15% duplicate entities** across global customer and organization records to establish unified golden records for analytics.

Databricks PySpark Lakehouse Modernization. I led the technical transition of 40+ legacy Informatica workflows to Azure Databricks Delta Lake and PySpark, reducing pipeline runtimes by **40%** and cloud compute costs by **~30%** with verified 100% data parity and automated schema evolution using Databricks Auto Loader.

Centralized Governance & Operational Quality. I implemented Databricks Unity Catalog for 3-level namespace governance, column masking, and end-to-end data lineage tracking. Working with downstream BI teams, I built 6+ executive Power BI dashboards with custom DAX models for operational scorecards.

30-Day Notice Period & Immediate Value. In the current Indian hiring market, standard 90-day notice periods create severe quarterly delivery drag. Because I am currently serving my official notice period at Cognizant, **I am available to join within 30 days**. I hold confirmed offer leverage at 10.9 LPA, seek a fixed CTC of 15.0 to 18.0 LPA, and look forward to discussing how my lakehouse and data quality engineering background can accelerate EY Global Delivery Services's data platform deliverables.
